

An EV Charging Network So Smart It Makes Reliability Easy--For Everyone.

Learn how ChargeUP, our nextgen EV charging platform management system enables true ROI for drivers, station owners and hosts.

It Doesn't Get Better Than Our EV Charging Administration Solution

Future-Proof Features

- ✓ True Open Charge Point Protocol (OCPP) compliant to select any network provider
- ✓ Web-enabled, platform independent, virtual & secure user access
- ✓ Support for driver access via both mobile phone application & RFID tag

Flexible Hosts & Station Roles

- ✓ Integrated: All chargers & locations are managed by one organization with host-defined rules
- ✓ Distributed: Enables variety in management business models, permissions, access, pricing and more

Multiple Pay Models Create Flexible Revenue Streams

- ✓ Ability to create usage rules that enable differentiation in EV charger access
- ✓ Ability to apply usage & pricing rules for accounts, drivers, vehicles and organizations
- ✓ Host-defined flexible pricing rules support revenue optimization, including public charging

The Driver
Experience is...**Intuitive
Flexible
Easy**

A Deeper Dive Into More Powerful Features

FULL OCPP MANAGEMENT

- ✓ ADR 2.0 & OCPI Compliant
- ✓ Multi-user EV charging hardware & driver management interface
- ✓ Location-aware EV hardware setup & management
- ✓ Web-enabled, platform independent, virtual & secure user access
- ✓ Roles-based system allows diversity of assignments for administrative users
- ✓ Support for driver access via both mobile phone application & RFID tags

ROBUST REPORTING

- ✓ Extensible report template creation enables custom reports
- ✓ Allows for charger and organizational usage and session reporting
- ✓ Ability to save and share report templates among administrative users
- ✓ Customized organizational logo provided on reports
- ✓ Data available to data analytics software via API

Apps & RFID Fobs

- ✓ Mobile apps make it easy for operators & drivers to communicate, while key fobs embedded with RFID make it simple for users to quickly charge

Even More Feature Benefits With ChargeUP

MULTIPLE PAY MODELS

- ✓ Ability to create usage rules that enable differentiation in EV charger access
- ✓ Ability to apply usage & pricing rules for accounts, drivers, vehicles, & organizations
- ✓ Host-defined flexible pricing rules designed to support a variety of business models
- ✓ Support for public charging, including kWh pricing, parking pricing & Independent tax structures & fee structures
- ✓ Ability to designate transaction fees as driver-paid or administrator-paid fees
- ✓ Driver accounting (via driver portal or mobile app) & charger administration accounting

FLEXIBLE HOST & STATION ROLES

- ✓ Integrated & distributed management models
- ✓ Native management & maintenance of chargers by an organization
- ✓ Enables a variety of “host” organizations to manage specific business models
- ✓ Provides for separate organizational permissions & access rights for hosts
- ✓ Host-level pricing & usage rules defined for specific locations
- ✓ Independent user logins & reporting for hosts vs. station manager

Why NovaCHARGE?

Trusted by hundreds of leading brands since 2008, we've done it enough that we truly mean ***"We Make EV Charging Easy."***

High Quality

1

Quality drives everything we do. We create Lifetime Value with our strict adherence to [open standards](#), ensuring interoperability and longevity

Instant Availability

2

Our stocking inventory of best-in-breed hardware provides quick order turnaround

Intuitive Services

3

Our intuitive cloud administration platform and driver apps offer unmatched ease of use and management

Premium Support

4

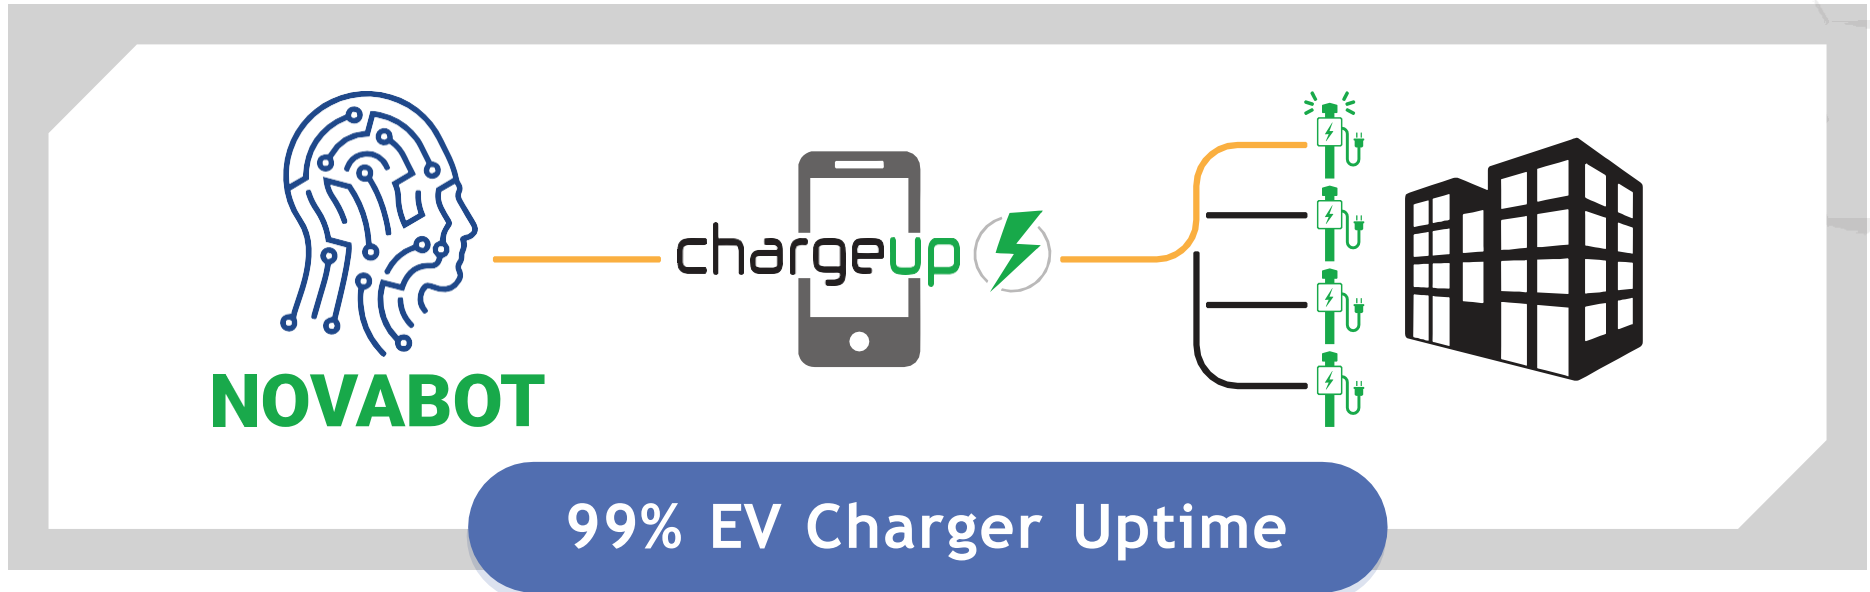

7/24/365 North American based support

Backed by the Strongest Warranty in the EVSE Industry

Artificial Intelligence Drives Reliable System Support

Plug into the latest technology with ChargeUP's AI-Driven NovaBOT proactive maintenance monitoring. Detect opportunities and potential issues 24/7/365 while you ensure reliability at every point in the network.

Thoughtfully Managing Every EV Charging Application

- ✓ Knows Who is Plugged-in
- ✓ Automatically Handles Operational Issues
- ✓ Adaptable to Varying Situations
- ✓ Hands Off to Human Agents When Needed
- ✓ Enhanced Notifications to Public or Fleet Drivers
- ✓ Scalable to unlimited number of chargers
